Passional Christi und Antichristi

An illuminating account of how Shakespeare worked through the tensions of Queen Elizabeth's England in two canon-defining plays Consipiracies and revolts simmered beneath the surface of Queen Elizabeth's reign. England was riven with tensions created by religious conflict and the prospect of dynastic crisis and regime change. In this rich, incisive account, Peter Lake reveals how in Titus Andronicus and Hamlet, Shakespeare worked through a range of Tudor anxieties, including concerns about the nature of justice, resistance, and salvation. In both Hamlet and Titus the princes are faced with succeedings forged under questionable circumstances and they each have a choice: whether or not to resort to political violence. The unfolding action, Lake argues, is best understood in terms of contemporary debates about the legitimacy of resistance and the relation between religion and politics. Relating the plays to their broader political and polemical contexts, Lake sheds light on the nature of revenge, resistance, and religion in post-Reformation England.

It is the first to consider how 'piracy' and representations of 'pirates' both shape and were shaped by political, social and religious debates, showing how attitudes to 'piracy' and violence at sea were debated between 1550 and 1650.

**The Maudlin Impression**

"The conventional image of Mary Magdalene tends to be a composite of four separate figures from the Gospels: Mary, sister of Martha and Lazarus; Mary Magdalene, from whom Jesus cast out devils; the unnamed woman who anoints Jesus's head; and the unnamed sinner who washes his feet with her hair. She was also often conflated with other women such as Mary the Hermite. Many Reformation writers tried to separate or recombine various elements, according to shifting notions of religious experience. Badir (English literature, Univ. of British Columbia) offers a literary history of this dynamic trope. Depictions range from Mary as a symbol of the reformation of a corrupt church and the only one to recognize the divinity of Christ to Mary as a legitimization of the courtesan. In this well-researched and clearly written book, Badir draws on poetry, homilies, plays, sermons, and paintings. VERDICT A valuable contribution for scholars of Renaissance literature, this will also be accessible to serious non-specialists curious about the figure of Mary Magdalene. T.L. Cooksey, Armstrong Atlantic State Univ., Savannah, GA"--Library Journal Reviews.

"Eve Darian-Smith takes us on an amazing journey spanning four centuries, brilliantly illuminating the continuously evolving interplay of law, religion, and race in the Anglo-American experience. This wonderfully readable book is imaginatively organized around a series of eight 'law moments' that ingeniously show how legal rights are subtly shaped by culturally prevailing ideas about religion and race."--Richard Falk, Albert G Milbank Professor of International Law Emeritus, Princeton University --

*Page 2/3*
This engaging book is the first full study of the satirical print in seventeenth-century England from the rule of James I to the Regicide. It considers graphic satire both as a particular pictorial category within the wider medium of print and as a vehicle for political agitation, criticism, and debate. Helen Pierce demonstrates that graphic satire formed an integral part of a wider culture of political propaganda and critique during this period, and she presents many witty and satirical prints in the context of such related media as manuscript verses, ballads, pamphlets, and plays. She also challenges the commonly held notion that a visual iconography of politics and satire in England originated during the 1640s, tracing the roots of this iconography back into native and European graphic cultures and traditions.

Local Identities in Late Medieval and Early Modern England

It is axiomatic that English people came to understand their places in society differently by the late seventeenth century. This collection explores how that happened by exploring how membership in communities was defined, and how individuals and corporate groups acted out their understanding of their places in society. Keith Wrightson's powerful exploration of how concepts of neighborliness evolved as the economy changed is joined with Marjorie K. McIntosh's work on changing identity politics in market towns. The confusions over identity and community inherent in border towns are taken up by K. J. Kesselring, while David Dean examines the mnemonic devices used in the Elizabethan Lottery to understand how people saw their communities. The overlapping worlds of London, Court and country are portrayed by Alexandra Johnston and Joseph Ward, while Catherine Patterson looks at the rhetoric of urban magistracy. The complexity of London's communities is explored by Shannon McSheffrey in her work on the liminal place of the late medieval clergy and sexual morality; by Ian Archer in his portrait of the charity of London widows; and by Paul Griffiths in a concluding chapter on the rhetorics of London's civil and religious identity, as seen in the discussions of growth that swirled around the building of Bridewell Hospital.
